## ***Hints For Wise Men***

- \* Directory Advertising and Success of business are Siamese Twins.
- \* If you stood 1000 men who ought to buy your goods, in a row, you certainly would sell some of them. The Directory puts them all in a row for you. Moral — Advertise in your Directory
- \* Master Minds of the Business World recognize advertising as the foundation stone upon which vast fortunes have been and still are being built. Your directory is one of the corner stones.

## Contact is the Basis of Civilization

---

By our contacts with others our ideas are broadened and fertilized. Man, by himself, alone, inevitably fails. He must have contact with his fellow men. This is an inexorable rule of civilization. It is in unconscious recognition of this rule that our daily contacts are made. It is with deliberate recognition and realization of this rule that trade associations are formed and continue to exist. The attendant interchange of ideas and ideals, made possible by association contacts, are the greatest factor in the refinement of a service or a product.

Your business, too, will react to the benefits to be derived from contacts made through the medium of your City Directory.

## **When The Initiative Has Passed From The Seller To The Buyer**

The executive who buys or specifies is frequently in doubt as to available sources of supply. Loyalty to his city and interest in its prosperity naturally directs his thoughts to the local market. His City Directory, "the Community Catalog," enables him to make an intelligent selection.

In the Classified Business Section, under the heading that fits his need, the buyer finds a complete list of sources for the commodity or service desired. These advertisements give detailed information which crystalize the desire into action at the point of purchase.

Is your business properly registered? Progressive executives recognize the value of business insurance and the determining influence exerted by proper City Directory representation.

## From Human Voice to Printed Word

---

The evolution of your city directory is an interesting, all-absorbing story of mankind's need for information and contact.

The first directory was a human element — the old town crier made known, for a fee, the wants and needs of the populace.

Soon communities became too large for this haphazard method. In 1595, at London, England, the first City Directory appeared.

From that time on, the city directory has grown in size, use, publication and appreciation, until today we have the modern "Community Catalog" containing the civic, social and industrial information of the city, presented in concise, easily ascertained compilation; factful and accurate.

Are you properly classified and emphasized in your city directory? You can insure and increase your business by this most definite means.
